EPIC SERIES

Natural Light & Traditional Design

Customization Options

Available from 80' – 120' Wide

The Epic Building Series has the look of a traditional building and all the benefits of a fabric building: natural light, superior ventilation, and no interior columns. A popular style for dairy buildings, Epic's straight wall design offers flexibility of door locations and sidewall features.

- **Design mezzanines and lean-tos for accessible drive-through and loading bay options**
- **Add eave packages to feed herd while the feed stays covered**
- **Raise the height of the legs as high as necessary, or add interior I-beam legs**
- **Install ice breakers to protect people and objects around fabric building**

The Ideal Choice

Barns

Epic buildings are recommended for commercial dairy farms and small family herds alike, allowing for modular configuration within the structure.

Fertilizer & Bulk Storage

Epic buildings easily accommodate conveyors and elevators forklifts, racks, loaders, and other heavy machinery.

Events & Hospitality

Our outdoor event fabric structures are designed to be spacious, inviting, and hospitable for your guests while withstanding in all climates.

Our Benefits

Building Strength

Epic buildings are designed with durable steel clad or fabric walls, depending on your custom need.

Natural Light & Ventilation

Epic buildings not only provide the most natural light but have the option for an overhang which allows for building coverage and superior ventilation.

Customized Height

Epic buildings can be customized to any height for overhead clearance space to accommodate large machinery.
